

## **EdShed to showcase engaging, evidence-informed learning platforms at Learning & Teaching Expo 2026 in Hong Kong**

Hong Kong, 25 June 2026 - EdShed, the award-winning UK education technology company behind Spelling Shed, MathShed, Phonics Shed and QuizShed, is delighted to attend the Learning & Teaching Expo 2026 in Hong Kong.

Taking place from 25-27 June 2026 at the Hong Kong Convention and Exhibition Centre, the Learning & Teaching Expo brings together educators, school leaders, policy makers and education innovators from across Asia and around the world. This year's theme, "Reimagining Education: Human-Centric, Future-Ready," closely aligns with EdShed's mission to create digital learning tools that are engaging for pupils, practical for teachers and rooted in strong pedagogy.

Founded by teachers, EdShed supports schools with curriculum-aligned resources for spelling, phonics, mathematics, vocabulary, retrieval practice and wider classroom learning. Its platforms are used by millions of children and thousands of schools each month, combining purposeful game-based practice with teacher tools, assignments, assessment data and reporting.

At the Expo, EdShed will meet with schools, groups and education partners interested in supporting English, literacy and mathematics across primary and international school settings. The company will demonstrate how its products help pupils build confidence and fluency while reducing teacher workload through carefully structured content, simple classroom management tools and clear insight into learner progress.

Alexander Athienitis, Co-Founder and Managing Director of EdShed, said:

*"We are excited to be in Hong Kong for the Learning & Teaching Expo and to connect with educators from across the region. EdShed began with teachers trying to solve real classroom problems: how to make practice more meaningful, how to help every child succeed, and how to give teachers tools that save time rather than create extra work. We look forward to showing schools how Spelling Shed, MathShed, Phonics Shed and QuizShed can support engaging, effective learning."*

EdShed's resources are designed to work flexibly across different school contexts, including British curriculum schools, international schools and bilingual learning environments. The company's approach combines explicit teaching, carefully sequenced practice, retrieval, fluency-building and engaging pupil experiences.

Visitors to the Learning & Teaching Expo can meet EdShed to explore free trials, product demonstrations and partnership opportunities.

ENDS

### **About EdShed**

EdShed is a UK-based education technology company founded by teachers. Its family of platforms includes Spelling Shed, MathShed, Phonics Shed and QuizShed. EdShed creates curriculum-aligned digital resources that support classroom teaching, independent practice, assessment and home learning. Its mission is to make learning engaging, purposeful and effective for children worldwide.
